Network Requirements
Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

Wireless Connection
Before connecting the machine to the network, the computer needs to be connected to the network. Make sure that configuration of the computer and access point or router is complete.
Preparing to Connect My Multifunction To My Network

Notes on Network Connection
The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device's instruction manual or contact its manufacturer.

The machine cannot be used over a wireless and wired connection at the same time.

An "Ad-hoc connection," which establishes a direct connection to the computer over a wireless connection without using an access point, is not supported.
Software Installation

To use the machine by connecting it to a computer, software including the drivers needs to be copied (installed) to the computer's hard disk. The installation process takes about 20 minutes. (The installation time varies depending on the computer environment or the number of application software to be installed.)

**IMPORTANT**

- Log on as the administrator (or a member of the Administrators group).
- Quit all running applications before installation.
- Do not switch users during the installation process.
- Internet connection may be required during the installation. Connection fees may apply. Consult the internet service provider.
- It may be necessary to restart your computer during the installation process. Follow the on-screen instructions and do not remove the Setup CD-ROM during restarting. The installation resumes once your computer has restarted.
- If the firewall function of your security software is turned on, a warning message may appear that Canon software is attempting to access the network. If such a warning message appears, set the security software to always allow access.
Software Installation

Do not connect the wireless LAN setup cable yet. Software installation requires temporary use of the wireless LAN setup cable.

**Step One**

Turn on the computer, then insert the Setup CD-ROM into the CD-ROM drive.

**Step Two**

Double-click the Setup icon of the CD-ROM folder to proceed to the following screen.
Step Three

Enter your administrator name and password. Click OK.

If the CD-ROM folder does not open automatically, double-click the CD-ROM icon on the desktop.

If you do not know your administrator name or password, click Help (?), then follow the on-screen instructions.

Step Four

Click Easy Install. Click Install.
The drivers, application software, and on-screen manuals are installed.
Note: If you want to select particular items to install, click Custom Install.
Step Five

Select **Use the printer on network**, then click **Next**.

Follow any on-screen instructions to proceed with the software installation.

---

Step Six

When the Printer Detection screen appears, click **Next**.

**IMPORTANT**
If the Printer Connection screen appears instead of the screen above, the connection method is not correctly selected in 5.

Follow on-screen instructions and proceed with the installation. Click Exit on the installation complete screen, then start again from 2 and be sure to select **Use the printer on network** in 5.
Step Seven
Make sure the machine is turned on, then click OK.

Step Eight
When the Set Up New Printer screen appears, click Next.

Note:
If the Detected Printers List screen appears, click Set Up New Printer.
Step Nine

When the Connect Cable screen appears, connect the machine to the computer with the wireless LAN setup cable. Follow the on-screen instructions and click Next.

1. Connect the printer and the computer using the wireless LAN setup cable.

2. Click [Next], and then wait until the printer is detected.

Printer detection may take some time. If the printer has not been detected, check that the printer is on and that the cable is connected, and then click [Next] again.
Installing the Drivers & Software

Step Ten
10-A

If the Detected Access Points List screen appears:
If the screen below does not appear, perform 10-B.

1. Select the target access point name/network name (SSID).

2. Enter the network key.
Enter upper and lower case letters of the alphabet correctly.
Letters are case sensitive.
To use WEP key number 2, 3 or 4, click WEP Key Number, then
specify the WEP key number.
3. Click Connect

Go to Step Eleven.

Note:
If the target access point is not displayed on the Detected Access Points List or Access Points screen, refer to the printed manual: Network Setup Troubleshooting.

For details on how to check the access point name/network name (SSID) and network key, refer to the manual supplied with your access point or contact its manufacturer.
**Step Ten**

**10-B**

If the **Confirm Connection Access Point** screen appears.

- **Confirm Connection Access Point**
  Printer's network connection will be set up by connecting to the following access point. Do you want to continue?

  **Access Point:**
  seescothree

  Clicking [Yes] will let this software obtain access point information saved in your keychain. If the 'Confirm Access to Keychain' dialog appears, click [Allow].

  If you want to select the connection access point manually, click [No].

  - [No]
  - [Yes]

- **Note:**
  If the target access point is not displayed in the **Confirm Connection Access Point** screen, click [No], then perform **10-A**.

**Make sure that the target access point is displayed, then click [Yes].**

If a screen asking for permission to access the keychain appears, click **Allow** or **Allow Once**.

**Canon IJ Network Tool wants to use your confidential information stored in “seescothree” in your keychain.**

The authenticity of “Canon IJ Network Tool” cannot be verified. Do you want to allow access to this item?

- **Details**
- [Always Allow]
- [Deny]
- [Allow]

**Note:**
If the target access point is not displayed, then perform **10-A**.
Installing the Drivers & Software

**Step Eleven**

When the Disconnect Cable screen appears, remove the wireless LAN setup cable, then click **Next**.

**Step Twelve**

Click **Complete** or **OK** on the **Setup Completion** screen.
Registering the Printer & Scanner

This section describes how to register the machine on a Macintosh computer.

Note:
The alphanumeric characters after Canon MP499 series is the machine's Bonjour service name or MAC address. If the machine has not been detected, make sure of the following.

- The machine is turned on.
- The firewall function of any security software is turned off.
- The computer is connected to the access point.
Registering the Printer & Scanner

Step One

When the Register Printer and Scanner screen appears, click Register Printer.

Proceed to the section that relates to your operating system for further installation instructions

Mac OS X v. 10.5.x / 10.6.x: Go to Step 2-A

Mac OS X v. 10.4.11: Go to Step 2-B
Registering the Printer & Scanner

Step Two
2-A
Select Canon MP499 series canonijsnetwork and click Add.

Step Two
2-B
1. When the Printer List window appears, click Add.

Note:
When the You have no printers available. screen appears, click Add.
**Step Two**

2-B

2. Click **More Printers** in the Printer Browser window.

**Step Two**

2-B

3. Select Canon IJ Network in the pop-up menu, select Canon MP499 series in the list of printers, then click **Add**.
**Step Two**

2-B

4. Make sure that Canon MP499 series is added to the list of printers.

Go to Step Three.

**Step Three**

When the Register Printer and Scanner screen appears, click Register Scanner.
**Step Four**

Select **Canon MXxxx series** on the **Scan-from-PC Settings** screen, then click **OK**. *xxx* refers to the model number.

**Step Five**

Click **Next** on the **Register Printer and Scanner** screen.

Wireless setup is now complete.
**Step Six**
Click **Next** on the **Print Head Alignment Recommended** screen.

**Step Seven**
Click **Next** on the **Register Printer and Scanner** screen.
Step Eight

If the **User Registration** screen appears, read the information and click **Next or Cancel**.

If the **Extended Survey Program** screen appears: If you can agree to Extended Survey Program, click **Agree**. If you click **Do not agree**, the Extended Survey Program will not be installed. (This has no effect on the machine’s functionality.).
Registering the Printer & Scanner

Step Nine

Click Exit. Setup is complete

*It is necessary to restart the computer before scanning using the Operation Panel on the machine for the first time.
