Preparing to Connect My Multifunction To My Network

**Network Requirements**
Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

![Diagram showing network connection](image)

**Wireless Connection**
Before connecting the machine to the network, the computer needs to be connected to the network. Make sure that configuration of the computer and access point or router is complete.
Preparing to Connect My Multifunction To My Network

Notes on Network Connection

• The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device's instruction manual or contact its manufacturer.

• In an office setup, consult your network administrator

• If you connect to a network that is not protected with security measures, there is a risk of disclosing data such as your personal information to a third party.

• If an error message appears or if you have trouble with the network connection, refer to the printed manual: Network Setup Troubleshooting.

• Place the machine and computer on the same network segment.

An "Ad-hoc connection," which establishes a direct connection to the computer over a wireless connection without using an access point, is not supported.

A wireless access point or router is required to use your printer on a wireless LAN.
Software Installation

To use the machine by connecting it to a computer, software including the drivers needs to be copied (installed) to the computer's hard disk. The installation process takes about 20 minutes. (The installation time varies depending on the computer environment or the number of application software to be installed.)

**IMPORTANT**
- Log on as the administrator (or a member of the Administrators group).
- Quit all running applications before installation.
- Do not switch users during the installation process.
- Internet connection may be required during the installation. Connection fees may apply. Consult the internet service provider.
- It may be necessary to restart your computer during the installation process. Follow the on-screen instructions and do not remove the Setup CD-ROM during restarting. The installation resumes once your computer has restarted.
- If the firewall function of your security software is turned on, a warning message may appear that Canon software is attempting to access the network. If such a warning message appears, set the security software to always allow access.
Installing the PIXMA MX892 on Your Wireless Network

If you are installing your printer on your network for the first time, a step-by-step walk through of the wireless setup is built in to the installation routine of the software that shipped with your PIXMA.

Insert the Setup CD-ROM * that came with your printer into your CD-ROM drive and proceed through the easy to follow instructions. You’ll be printing wirelessly in no time. Be sure to select Network Connection, then Wireless Connection on the Connection Method Selection screens (1-1 and 1-2).

Continue to follow instructions until the Setup Procedure Selection screen (3-1) appears. This is shown on the next page.

* If you do not have the Setup CD-ROM you can still Install the printer using the download file available on our web site. Click Here for information.
Connecting to the Wireless Network

The printer automatically searches for access points that support **WPS** (Wi-Fi Protected Setup)*.

*Unless you are absolutely sure your access point supports WPS and you are familiar with activating this on your access point, **press the Stop button** on the printer’s operation panel and click on **Other Methods** on the **Setup Procedure Selection** screen (screenshot shown below)*.

If the **Push Button Method** is not shown on the printer’s operation panel (when no WPS access points have been detected), select **Standard setup** on the printer’s operation panel, then click **Other Methods** on the **Setup Procedure Selection** screen.

If you selected the **Push Button Method**, follow any remaining instructions to complete setup.

If you selected **Other Methods**, please continue to the next page for important information.
For Standard setup only

Select Standard setup on the Setup Procedure Selection screen (3-2)

Continue to next page before proceeding any further with setup
Connecting to the Wireless Network

Follow On-screen instructions. When you get to Step 4-2 and later in Step 4-4 (screens shown below) you will need to know SSID and password information*

**Step 4-2**

1. Select your **access point**, then press the **OK** button.
   
   If another screen appears, refer to "Troubleshooting" on the right.

   **If you don’t know your access point name**

   **Select the automatically displayed access point name in the printer screen.**

**Step 4-4**

1. Enter the **network password** (WEP key or passphrase) of your **access point** or **router** into the printer.

   **If you don’t know the network password for your access point**

   Enter the automatically displayed network password in the printer screen.

   Click **here** for details on how to enter characters.

2. Press the left **Function** button.

*Unless you are absolutely certain of this information, please continue to the next page for information on locating / verifying this information

Continue to follow the on-screen instructions. Click **Next** when the **Completion of Connection** screen (4-7) appears.
Connecting to the Wireless Network

If you don't know your Access Point / Router name or SSID*, or the Passphrase or Network key for your wireless network, you can find this information during Standard setup using the Setup CD-ROM or the downloaded file (Mini Master Setup).

*The terms 'SSID' and 'AccessPoint / Router' refer to a name used to identify the specific Access Point or Router. "Passphrase' and 'Network Key' refer to a password required to prevent unauthorized access to communication.

Look for the **Confirm the access point name** or the **Confirm the network key (automatic display)** buttons during the setup procedure.

Clicking either of these buttons will give the needed information. On a Mac OS X system you may need to click 'Allow' on one or more windows after clicking either of the above buttons. See example below of the Wireless Lan Setup Information window. (appearance varies depending on Operating System). Use the provided information when selecting the Access Point / Router and for entering the Network Key (Steps 4-2 and 4-4 on the previous page).
Network setup is complete. Continue to follow any remaining On-screen instructions to install the software. On the Software Installation List screen, select any software to be installed. **MP Drivers** and **Canon IJ Network Tool** are required for the printer to be able to print and scan and cannot be de-selected. **MP Navigator EX** and **Easy-PhotoPrint EX*** are highly recommended to take full advantage of your printer’s features.

*Note: If you are using the downloaded **Mini Master Setup** file, only the **MP Drivers** and **Canon IJ Network Tool** will be installed.

You can download the additional software applications from the **Software** section of the **Drivers & Software** page where you obtained the Mini Master setup file.
Click Add Printer on the Add Printer window.

Add Printer

When you click [Add Printer], printers that can be added will be displayed. Select Canon MX890 series for which “Canon IJ Network” is displayed in the Kind field, and then click [Add]. After adding the printer, click [Next].

If printers that can be added are not displayed or if you are not sure how to use the screen, click [Help].
Select the **Canon MX890 series** with **Canon IJ Network** listed in the **Kind** column. Click **Add**.
Click Next on the Add Printer window.

Add Printer

When you click [Add Printer], printers that can be added will be displayed. Select Canon MX890 series for which “Canon IJ Network” is displayed in the Kind field, and then click [Add]. After adding the printer, click [Next].

If printers that can be added are not displayed or if you are not sure how to use the screen, click [Help].

Setup is complete. Continue to follow on-screen instructions to finish and exit the setup program.
Installing the PIXMA MX892 on Your Wireless Network

If you can’t find your CD-ROM, you may download the MX890 series Mini Master Setup, which includes the same step-by-step installation as the CD-ROM, by following the instructions below:

1. Click here to access the MX892 Drivers & Software page.
2. Select the operating system and version of your computer (see example below).
3. Expand the ‘Drivers’ section, if necessary, by clicking the red triangle.
4. Click on ‘MX890 series Mini Master Setup’.
5. After reading the details and disclaimer, click ‘I Agree – Begin Download’ and save the file to your computer.
6. Once the download is complete, double-click the file from its download location to begin the installation.

Drivers & Software

Select an Operating System and OS Version from the drop down menu below then click on view the latest supported files for your product. Click on the file description to navigate to click on "I Agree - Begin Download" to start downloading.
