

Uploading Recordings to YouTube and Facebook Using an Computer

Uploading Recordings to YouTube and Facebook Using an Computer

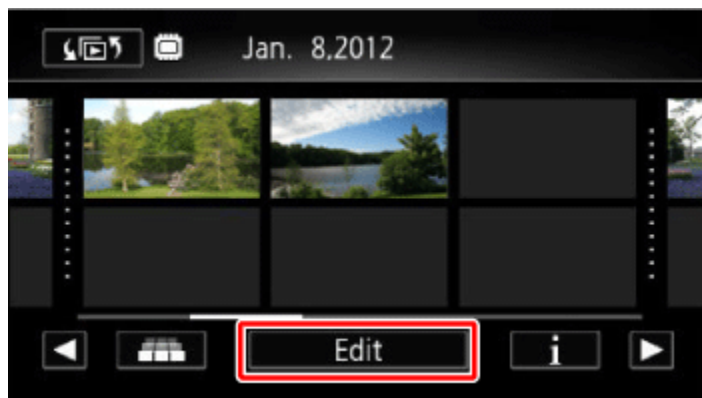

You can upload movies to YouTube and movies and photos to Facebook using the supplied software Network Utility running on a Windows computer.

IMPORTANT

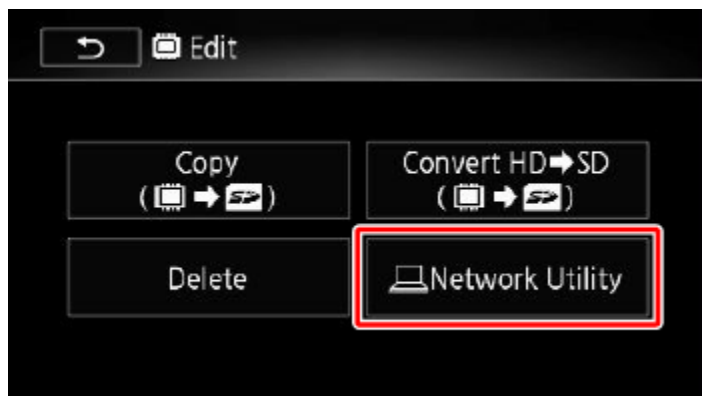

If you have not done so already, complete the Wi-Fi network setup and file transfer destination setup in advance.

* Network Utility will be installed automatically after you install VideoBrowser.

1. Set the camcorder to playback mode and then press [].
2. Open the index screen that contains the recordings you want to upload.
3. Select the service you wish to upload to.
 - 3-1. Touch [Edit].

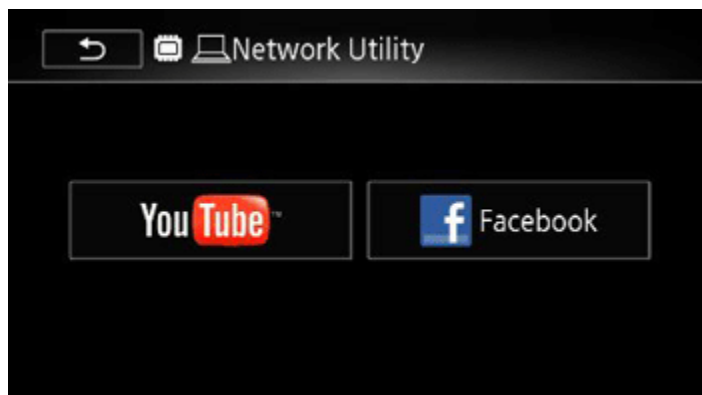

- 3-2. Touch [Network Utility].

5. Upload recordings.

If you are uploading to YouTube, read the YouTube agreement carefully and touch [I Agree] if you agree.

Touch the desired connection point to connect the camcorder to the network and then touch [OK].

- Once connected, or if only one connection point has been set up, the wireless upload will begin automatically.

You can touch [Stop] and then [, X] to cancel the wireless upload while it is in progress.

6. Touch [OK].

NOTE

Depending on the wireless router's settings and capability, it can take some time to upload video files
