POWERED BY

THE NEXT GENERATION IN COLOR MULTIFUNCTION TECHNOLOGY

Meet the color-enabled Canon imageRUNNER® C3170 Series— multifunction imaging systems in a class of their own.

The color-enabled imageRUNNER C3170 Series is a new breed of customizable office solutions. Featuring Canon's next-generation Color imagePlatform controller and innovative MEAP® (Multifunctional Embedded Application Platform) technology, the compact imageRUNNER C3170 Series is *Internet-ready* for the tightest possible integration with your existing network infrastructure.

Inheriting Canon's reputation for performance and image quality that has become synonymous with the imageRUNNER name, the Canon imageRUNNER C3170 Series is the tool your company needs not just to survive, but to thrive in today's ultra-competitive business environment.

A COMPLETE SPECTRUM OF FUNCTIONALITY

More than color-enabled digital copiers/printers, the imageRUNNER C3170 Series is a total color communications hub for your entire office.

The imageRUNNER C3170 Series is actually a pair of versatile, modular machines that may be configured to meet your individual needs—right down to matching specific workflows unique to your business through MEAP technology. The imageRUNNER C3170 Series models deliver output at up to 31 ppm in black and white and 7 ppm in full color, while paperless information distribution is executed at network speed and minimal cost by sending files over data lines. Canon's innovative Color Universal Send™ technology is standard and ensures the instantaneous delivery of information to all recipients simultaneously via Scan-to-E-Mail, Scan-to-I-Fax, Scan-to-File, and Scan-to-Mail Box. In addition, the imageRUNNER C3170 Series can be equipped with single or dual-line Super G3 faxing. Both models also serve as a local document library for archival/print-on-demand needs through integrated Mail Boxes that are part of the systems' standard 80GB Hard Disk Drive. Information is never out of reach with the power of imageRUNNER technology working for you.

Scan while you print. Print while you fax. Program and scan originals for the next job while the system is busy. And every user has access to intuitively designed drivers and utilities plus real-time system status through Remote UI™ to help improve productivity.

  † Requires Web Access Software-B1. (Check with your local Authorized Canon Dealer for availability.)
  ▲ Requires Color PCL/PS Printer Kit-D1 if printing PDF files.
  ▲▲ Requires additional accessories.
MODULAR AND VERSATILE

The imageRUNNER C3170 Series can be easily configured to expand your possibilities.

If your office does lots of scanning and copying, add the optional Duplexing Automatic Document Feeder-L1 to quickly capture multipage and different-size originals. True 600-dpi scanning and Canon's image enhancement technologies ensure every page is reproduced with outstanding image quality.

The imageRUNNER C3170 Series includes a dual 550-sheet Universal Cassette Paper Feeding System plus a 50-sheet Stack Bypass that can handle stocks up to 90 lb. Index and 12" x 18" for the production of durable reports, signage, and full-bleed comps. Of course, stackless duplexing is standard for the unlimited creation of two-sided pages

and booklets, but the imageRUNNER C3170 Series' superior paper handling doesn't stop there. The optional Cassette Feeding Unit-Y2 adds two more 550-sheet sources for media flexibility when the job calls for adding covers and inserts. For higher-volume needs choose the 2,500-sheet Paper Deck-Q1 to minimize paper reloading. Or add both—the choice is yours to configure the system to meet your evolving applications.

DADF-L1

Feed stacks of single- or two-sided originals for copying, scanning, storing, or sending through the versatile DADF.

Finisher-Q3

Saddle Finisher-Q2

Choose the Finisher-Q3* for multiposition stapling and collating tasks, or step up to the Saddle Finisher-Q2* for increased stacking capacity and stapling versatility. For the ultimate in finishing productivity, the Saddle Finisher-Q2* offers multiposition stapling, automatic saddle-stitching, and folding for booklet production.
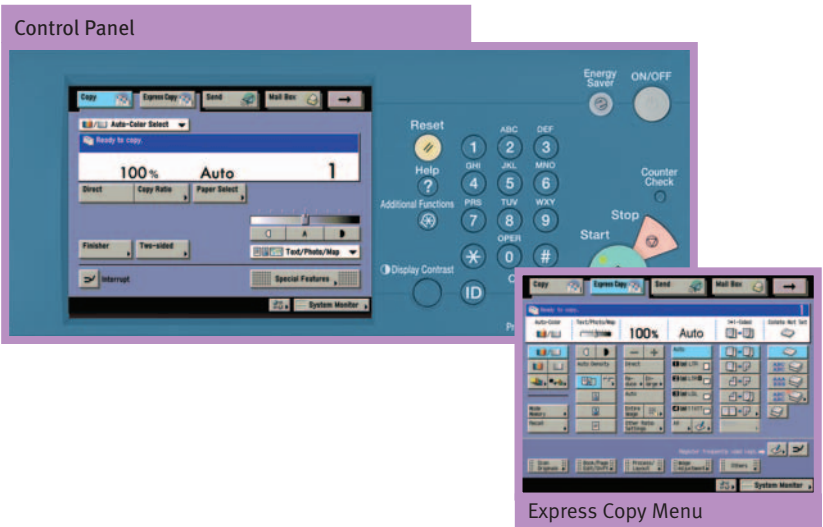

Paper Trays

Feed stocks up to 90 lb. Index and as large as 12" x 18" through all paper cassettes.

* Puncher Unit-M1 (optional) available for two- or three-hole punching. Must be configured with Finisher-Q3 or Saddle Finisher-Q2.

## ADVANCED FEATURES TO MEET YOUR EVOLVING NEEDS

Enhancements to Digital Copying and Mail Box functions make competitive systems seem like ancient history.

While other systems struggle to meet imageRUNNER standards, Canon continues to set the pace with innovations that help keep your business at the cutting edge.

Take copying, for instance. When full-color or monochrome hard copy is required, users can easily switch between the standard display and the Express Copy menu to speed the programming of desired features. There's even a language switch to quickly jump to another language for multilingual offices or executives visiting from abroad. The imageRUNNER C3170 Series can create virtually unlimited combinations of page/copy set numbering, watermark, and date printing modes to meet your office's document tracking and Bates Stamping requirements. Automatic Color Selection decides which pages are to be printed in black or full color, saving money and time. A wide range of image and color manipulation features, such as Area Designation or Form Composition, allow for document editing.

When digital storage of hard-copy originals is required, your Canon imageRUNNER C3170 Series device serves as a local archival solution—at no additional cost—with its standard Mail Box function. Up to 100 Mail Boxes can be password-protected for increased security. Documents may be reprinted on demand with original image quality intact. What's more, users may preview thumbnails of stored documents in the full color display for easy identification, and Merge and Save function features allow users to create new documents, delete or insert individual pages into a file, and even save them to multiple Mail Boxes in a single operation. If the resulting file is larger than your e-mail server can handle, no problem! Send the URL address of the Mail Box and let your recipients download the file at their convenience with Canon's URL Send function.* One more example of how imageRUNNER technology is pushing the limits of what you can expect from a complete document production and communications solution.

UNIVERSAL SEND™

BRIDGING THE GAP BETWEEN GENERATIONS AND DESTINATIONS

Canon's information sharing and document management technologies
help bring order to chaos as MFPs evolve into true network peripherals.

Standard on every imageRUNNER C3170 Series model, Canon's Color Universal Send technology is the optimal paperless document distribution solution for smaller workgroups and departments. Leverage the power of your existing network infrastructure to share data and reduce faxing, filing, and hard-copy shipping expenses across your organization. Simply scan a document with the desired page, color, and image editing settings, select one of several industry-standard file formats, and push it to any network recipient in full color. Canon's next-generation Color Universal Send even allows network administrators to restrict access to specific destinations for complete control over information distribution. When communication needs extend beyond networked recipients, the imageRUNNER C3170 Series answers the call with optional Super G3 faxing to transmit documents as fast

as three seconds per page.** As plain paper fax machines, the imageRUNNER C3170 Series delivers outstanding image quality and offers a robust feature-set, including advanced forwarding, one-touch dialing, and a dual line option for fax-intensive environments. With the bundled Canon Fax Driver, connected users can easily send faxes with cover pages right from the desktop.

Add the optional PDF High Compression Kit-A1 to the imageRUNNER C3170 Series' standard Color Universal Send function and send complex and detailed color pages efficiently over network lines. Canon's PDF High Compression technology squeezes files to their absolute minimum size, without impacting image quality, so that recipients can see documents exactly as intended, despite the original file size.

**Approximate 3-second-per-page fax transmission time based on ITU-T No. 1 Chart (JBIG, Standard Mode) at 33.6 Kbps modem speed when transmitting to another V.34 machine. The Public Switched Telephone Network (PSTN) currently supports 28.8 Kbps modem speeds or lower, depending on telephone line conditions.

NEXT-GENERATION IMPROVEMENTS
FOR A TRULY INNOVATIVE SOLUTION

When the optional Universal Send PDF Enhancement Kit-C1 is installed in conjunction with the PDF High Compression Kit-A1 (also optional), users can take advantage of advanced capabilities, including Searchable and Encrypted PDF. The Searchable PDF feature uses optical character recognition (OCR) processing on a scanned image to extract text and create a document that can be searched by keywords. The Encrypted PDF function sets a password for the scanned file, limiting the ability to open, edit, or print the file to recipients with the proper password for improved security.
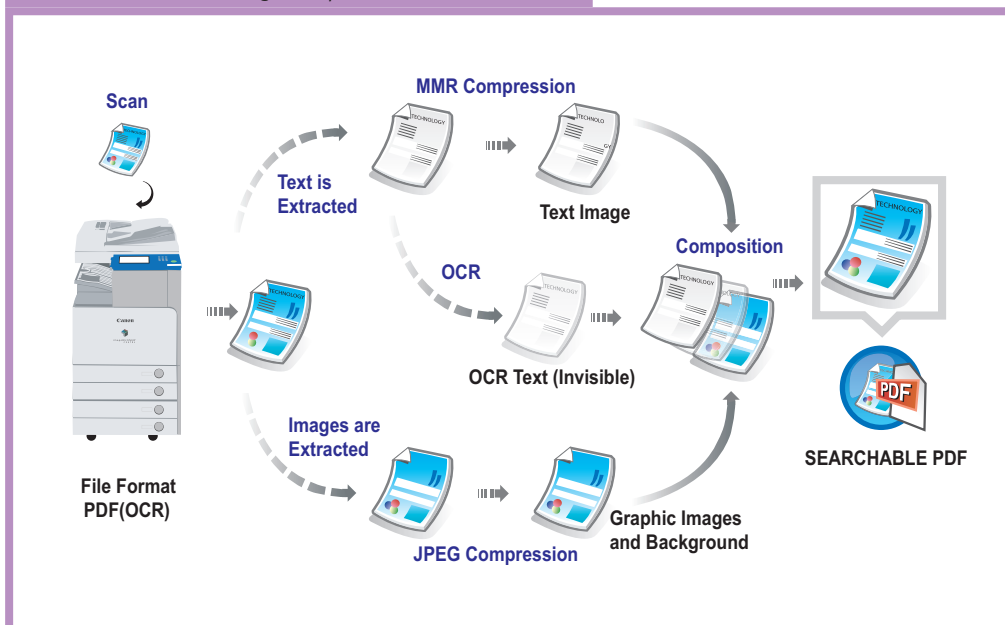

Canon imageWARE™ Software

After your mountains of hard copy have been transformed into digital documents, how do you manage them to ensure efficient archival and retrieval? The answer is Canon's optional imageWARE software. Featuring utilities such as imageWARE Scan Manager for capturing and indexing paper originals and imageWARE Document Manager for organizing these files into an easy-to-manage database, Canon supplies the software to streamline your workflow, improve employee productivity, and positively impact your bottom line.

PRINTING FUNCTIONS THAT PUT THE imageRUNNER C3170 SERIES IN A CLASS BY ITSELF

Print faster, easier, and in more ways than you ever thought possible.

The print-ready imageRUNNER C3170 Series puts the right amount of printing power just where your business needs it—in the hands of every connected user. True 600-dpi scanning and Canon's image enhancement technologies help ensure that every page is reproduced with outstanding image quality at resolutions of up to 2400 x 600 dpi. Both models leverage the power of dual processors to ready pages for output faster than ever before and drive the engine at rated speeds for maximum productivity.

Both devices ship standard with Canon's proprietary Ultra Fast Rendering (UFR) II printing technology. With support for both Windows® and Macintosh® operating systems, UFR II offers the ideal blend of speed and simplicity for budget-conscious offices producing typical Microsoft® Office files. This unique printing solution uses the processing power of the sending PC to balance the data load and augment its own capabilities to prepare files at blazing speed. As a result, professionally finished documents are generated quickly from a few simple point-and-click print commands in the user-friendly UFR II driver screens. The Color PCL/PS Printer Kit-D1, which ships standard with the "i" model and is available as an option on the "U" model, enables the efficient processing of larger PDF documents, PCL files, and sophisticated PostScript® 3™ (emulation) data in general office environments.

The imageRUNNER C3170 Series even allows users to add digital data to printed sets, such as set numbering for document tracking needs with complete control over size, position, numbers, color, and density. When the file needs to be archived, the device can even print to multiple Mail Box destinations in a single operation for paperless document storage.

CREATE A BETTER WORKFLOW
TO FIT YOUR NEEDS

The stress of managing information, multiple tasks, and devices the old way is gone. Canon helps you get back to doing your real job.

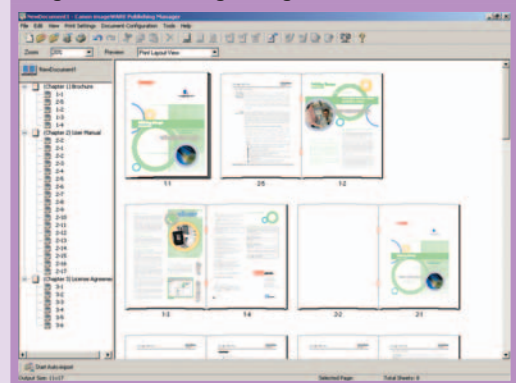

Special printing requirements▲ are no stretch for these color-enabled imageRUNNER devices either. Maintain confidentiality with the Secured Print function. Print PDF files directly, without opening Acrobat,® to help minimize network traffic. Insert separator pages between jobs. Restrict the ability of individual network addresses to access the printer. The imageRUNNER C3170 Series can do it all.

Access the Internet from Your imageRUNNER Device!

When information is already in printable form, the imageRUNNER C3170 Series lets you completely bypass the PC. This innovative Web Access option features customized software to link users directly to the Internet through the imageRUNNER C3170 Series devices' control panel with familiar browser navigation and complete control over Internet accessibility settings. Access Internet or intranet sites by typing in the URL or selecting a favorite address, and view and print Web pages and PDF files.†

imageWARE Publishing Manager

Put It All Together with Canon imageWARE Publishing Manager

The powerful combination of imageRUNNER hardware and Canon's optional imageWARE Publishing Manager software delivers a complete solution for compound document creation with optimal output quality. Produce professional-looking documents containing various source files, color inserts, and content types with access to a number of editing, imposition, stamping, and finishing capabilities. Every connected user now has the ability to create sophisticated manuals, brochures, catalogs, proposals, reports, books, and presentations in a simple drag-and-drop document building environment.

▲May require optional equipment.

†PDF printing only is available on the imageRUNNER C3170U when the Canon Color PCL/PS Printer Kit-P1 is installed (standard on C3170i model).

A STEP AHEAD OF THE CURVE

The imageRUNNER C3170 Series goes the extra distance to ensure total device and data security to deliver peace of mind.
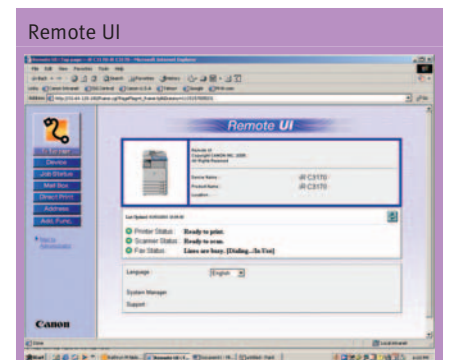

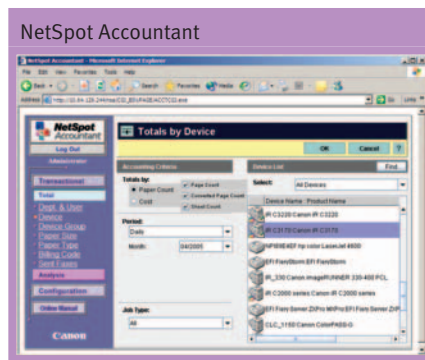

With all the critical data flowing through your network, it's no wonder security is one of your top priorities. Left unprotected, that network connection to your MFP is an open door, leaving valuable corporate data vulnerable to loss and theft. That's why Canon has equipped the imageRUNNER C3170 Series with a wide range of tools and utilities to control device access, track and restrict system usage, monitor status in real-time, and even allow for device customization.

Start by knowing who is using the system and what they're printing. Canon's Department ID Mode tracks and limits access to walk-up users assigned a valid name and password. Set volume ceilings and control access to color or black-and-white copy, scan, and print functions for up to 1,000 departments or users. Single Device Login (SDL) performs user authentication and can be linked to Department ID. Single Sign-On (SSO), another network authentication tool, permits existing network IDs and passwords to be used so employees can maintain a single identity for all network security functions.

Once device access is granted, Canon's NetSpot® Suite and Remote UI help ease administrative burdens of installing, monitoring, and managing networked devices, while the new Device Information Delivery settings broadcast desired settings of a target machine to all other networked imageRUNNER systems throughout the department for identical operability. To help manage multiple printers in larger environments, Canon's optional Print Server Appliance (PSA) simplifies device discovery, management, and driver downloads to relieve IT staff of individual client support/upgrade responsibilities. With Remote UI, users can see up-to-the-moment system status from a standard Web browser to make informed printing decisions and boost productivity across the workgroup.

Modify System Operability to Meet Unique Workflows

Based on Java technology, Canon MEAP architecture allows the system to incorporate unique applications that run embedded within the device. The result is total integration into your company's infrastructure by presenting customized applications to walk-up users directly from the device's full-color LCD panel.

NetSpot Accountant

Remote UI

EXCEEDING YOUR EXPECTATIONS

While most multifunction devices only deliver the basics, the imageRUNNER C3170 Series offers all the tools to help you perform your best.

Voice Guidance

Critical Information Under Virtual Lock and Key

The imageRUNNER C3170 Series security features protect every bit and byte of critical information. Password-protect Address Books, Mail Boxes, and individual files, and even encrypt data and passwords as they flow over the network to help prevent interception and deciphering by hackers. Authenticate users with their existing Windows network or LDAP e-mail server IDs, and set restrictions on network destinations to help guard against transmissions to unauthorized destinations. For even greater protection, the optional imageRUNNER Security Kit-A2 enables 168-bit encryption and can overwrite the hard disk to completely erase stored data.
Section 508 Compliance: Advanced Options Bring Total Access to All Users

The imageRUNNER C3170 Series goes even further to ensure equal device access to all authorized users. Users can operate the system from a laptop or desktop computer using the Remote Operator's Software Kit-A1 that emulates control panel operability on a PC screen. Visually impaired users can receive audible job confirmation through the optional Voice Guidance Kit-A2. Together, these features bring professional documents to production, regardless of physical abilities.
Image of a Leader

As the industry's leading producer of network-connected multifunction devices, Canon continues to set new standards for quality, performance, and reliability. That's why you can trust Canon to provide you with solutions to make your department more productive and your business more competitive.

imageRUNNER® C3170 SERIES

imageRUNNER C3170 Series Specifications

Type:	Color Digital Multifunction Imaging System
Imaging System:	Laser Dry Electrostatic Transfer
Developing System:	Dry Dual Component Developer
Image Server Memory	
C3170U:	512MB (Std.) + 80GB HDD
C3170i:	1GB (Std./Max.) + 80GB HDD
Copy/Print Speed (B/W, Color):*	Up to 31 ppm/7 ppm (Letter)
Scan Speed:	Up to 44 ipm (B/W and Color at 300dpi)
Printing	
C3170U:	UFR II (Std.); PCL5c and PS Emulation (Opt.)
C3170i:	UFR II, PCL 5c, PS Emulation (Std.)
Print Resolution:	Up to 2400 dpi Equivalent x 600 dpi
Copy Resolution:	600 dpi x 600 dpi
First-Copy Time:	Less than 8 Seconds (B/W) Less than 23.9 Seconds (Color)
Warm-Up Time:	6 Minutes or Less
Max. Original Size:	11" x 17"
Max. Copy Size:	12" x 18"
Min. Copy Size:	3-7/8" x 5-9/16"
Max. Copy Reservation:	5 Jobs
Max. Mail Boxes Supported:	100
Color Modes:	Auto-Color Select, Full Color, Black, Single Color, Two Colors
Copy Exposure:	Automatic, Manual (9 Levels)
Original Type:	Text/Photo/Map, Printed Image, Photo, Text
Halftones:	256 Gradations (Continuous-tone)
Duplexing:	Standard Automatic Trayless Duplexing up to 28 lb. Bond
Copy Ratio:	25% to 400% (in 1% Increments)
Special Features	Two-Page Separation, Cover/Sheet Insertion, Image Combination, Shift, Booklet, Transparency Interleaving, Job Done Notice, Margin, Different-Size Originals, Job Build, Scan Image Check, Frame Erase, Image Creation, Sharpness, Image Adjustment, Area Designation, Form Composition, Pg/Copy Set Numbering, Recall, Watermark/Print Date, Mode Memory
Multiple Copies:	1 to 999
Network Scanning Utility:	Color Network ScanGear
Color Universal Send (Std.)	
Sending Methods:	E-Mail, I-Fax, Super G3 Fax (Opt.; 1 or 2 Lines), File Server (IPX, FTP, SMB), User Inbox (includes URL Send)
Address Book Capacity:	Max. 1,800 Destinations Max. 5 LDAP Servers
File Formats:	TIFF, JPEG, PDF, PDF (Compact) (Opt.),** PDF (OCR) (Opt.),**/***
Sending Sizes:	Statement to 11" x 17"
Paper Sources	
Standard:	Dual 550-Sheet Paper Cassettes Stack Bypass (50 Sheets)
Optional:	2,500-Sheet Paper Deck (20 lb. Bond) Dual 550-Sheet Cassette Feeding Unit (4,750 Sheets Max.)
Paper Weight:	17 lb. Bond to 90 lb. Index
Network Interface Connections:	10/100Base-T (RJ-45), USB 2.0
Dimensions (H x W x D):	29-3/4" x 22-1/4" x 29-3/4" (754mm x 565mm x 755mm)
Installation Space (W x D):	40-3/4" x 48-3/4" (862mm x 755mm) (When Stack Bypass is Extended)
Weight:	190 lb. (86.2 kg)
Power Requirements:	120V AC, 60Hz, 11A
Power Consumption:	1.2kW (Max.)
Toner Yield:	23,000 Black @ 5% Coverage, 8,500 Each Color @ 5% Coverage

Optional Accessories

Duplexing Automatic Document Feeder-L1

Acceptable Originals:	Statement to 11" x 17"
Capacity:	50 Sheets (20 lb. Bond/Letter)
Max. Paper Weight:	13 lb. to 32 lb. Bond (Letter, One-Sided) 13 lb. to 32 lb. Bond (Letter, Two-Sided)

Cassette Feeding Unit-Y2

Paper Capacity:	Dual 550-Sheet Paper Cassettes (1,100 Sheets/20 lb. Bond)
Acceptable Paper Size:	Statement-R to 12" x 18"
Acceptable Paper Weight:	17 lb. to 90 lb. Index

Envelope Feeder Attachment-C1

Copy Speed:	3.4 cpm (Monarch), 2.2 cpm (Other)
Acceptable Envelopes:	COM10, Monarch, DL, ISO-B5, ISO-C5, Yougata 4
Feeder Capacity:	Approx. 50 Envelopes or 1-1/4"

Paper Deck-Q1■

Paper Deck Capacity:	2,500 Sheets (20 lb. Bond)
Paper Size:	Letter
Acceptable Paper Weight:	17 lb. to 28 lb. Bond
