| **Recording Media** | CF Card (Type I, compatible with UDMA 7 CF cards) and CFast™ Card (CFast 2.0™ supported)  
As of February 2016, compatibility has been verified for the following CFast™ memory cards: |
| Manufacturer | Label | Model Numbers | Capacity |
| SanDisk | Extreme PRO CFast 2.0™ Card | SDCFSP-128G-G46B | 128 GB |
| | Extreme PRO CFast 2.0™ Card | SDCFSP-064G-G46B | 64 GB |
| Proper operation can not be guaranteed for all recording media. Long term usage may reduce a CFast™ card's write speed. We recommend users regularly fully format and refresh their card using the “Full Format and Refresh Tool.” |
* Canon is an authorized licensee of the CFast 2.0™ trademark, which may be registered in various jurisdictions. |
| **Image Format** | Approx. 36mm x 24mm (35mm Full-frame) |

• Self-cleaning can be done automatically when the power is turned on/off.  
• During manual cleaning ([Clean now]), the data for light spot correction is also obtained.  
(2) Dust Delete Data acquisition and appending  
• The coordinates of the dust adhering to the low-pass filter are detected by a test shot and appended to subsequent images.  
• The dust coordinate data appended to the image is used by the EOS software to automatically erase the dust spots.  
(3) Manual cleaning |
