

PRINT FROM AND SCAN TO MICROSOFT TEAMS® on Canon Multifunction Printers

uniFLOW Online's integration with Microsoft Teams can help increase office productivity by allowing users to print from, and scan to, Microsoft Teams directly from the user interface of a compatible Canon imageRUNNER ADVANCE or imageCLASS multifunction printer (MFP).

Print From Microsoft Teams

Users can navigate to a specific Team or Channel and search through available folders to select files for printing—all from the MFP user interface.

Scan To Microsoft Teams

Users can search for a Team or Channel from the MFP user interface, and easily scan documents, define file names, and add a subject and message to be posted with the scanned document.
