EOS WEBCAM UTILITY SOFTWARE
Mac OS Offical Release Version

With so many of us relying on livestreaming and video calls on a day-to-day basis to stay connected with friends, visiting clients, getting an education, and so much more, the quality of that connection is key. We are proud to announce the release of the official version of our EOS Webcam Utility software for Mac OS, which lets you turn your compatible Canon EOS camera into your main webcam using only a USB cable.

REQUIREMENTS

- ⊘ A camera compatible with EOS Webcam Utility Official Release software (see chart below).

- ⊘ A USB cable* to connect the camera to the computer.

- ⊘ A computer with an internet connection and an operating system capable of running the EOS Webcam Utility Release software.

- ⊘ EOS Webcam Utility Beta version needs to be uninstalled if previously installed on the computer.

  The following are current system requirements: macOS Catalina (10.15), macOS Mojave (10.14) or macOS High Sierra (10.13), Intel Based Processor, 2GB RAM or greater, display screen resolution of 1,024x768 pixels or more, and approx. 32,000 colors or more.
  *See compapible accessory chart on the last page

ENHANCEMENTS

- ⊘ More compatibility with your favorite communication and streaming programs.

- ⊘ A larger list of compatible cameras that can take advantage of the EOS Webcam Utility.

- ⊘ The ability to record internally on your camera while you are streaming giving you the maximum image quality for post-production editing.*

  *Recording time might not be the same as streaming time, refer to your manual for maximum recording time

COMPATIBLE APPLICATIONS

- Apple Facetime
- Cisco Webex®
- Discord
- Facebook Live
- Hangouts™

- Hangouts Meet™
- Messenger
- Microsoft Teams
- Open Broadcaster Software®
- Skype

- Slack
- Streamlabs
- YouTube Live
- ZOOM

EOS Webcam Utility software does not support apps downloaded from the App Store. Please download the application from the service provider's website where available.

HOW TO DOWNLOAD

1. Open your web browser and either go directly to our [EOS Webcam Utility Website](#) OR follow the steps below to navigate through the [Canon USA Website](#).

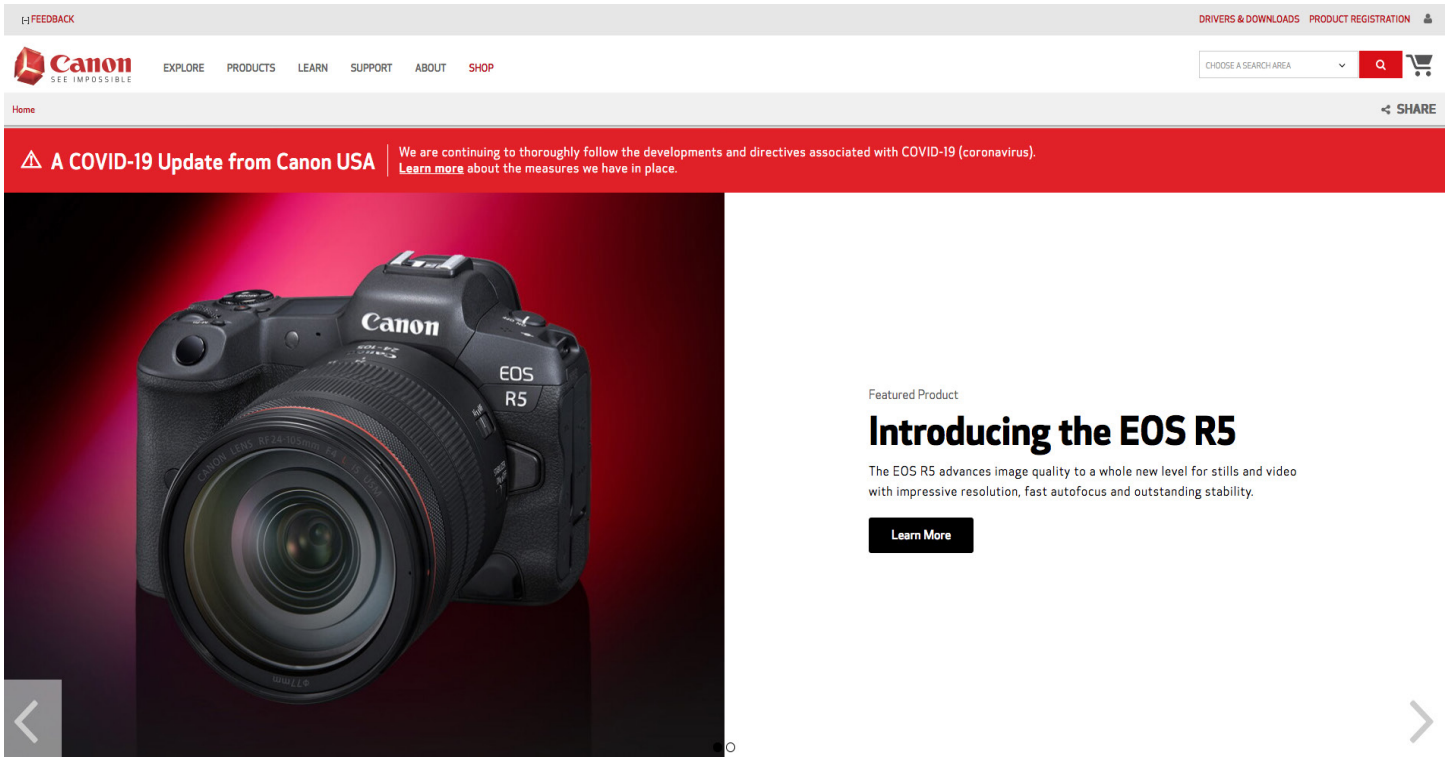

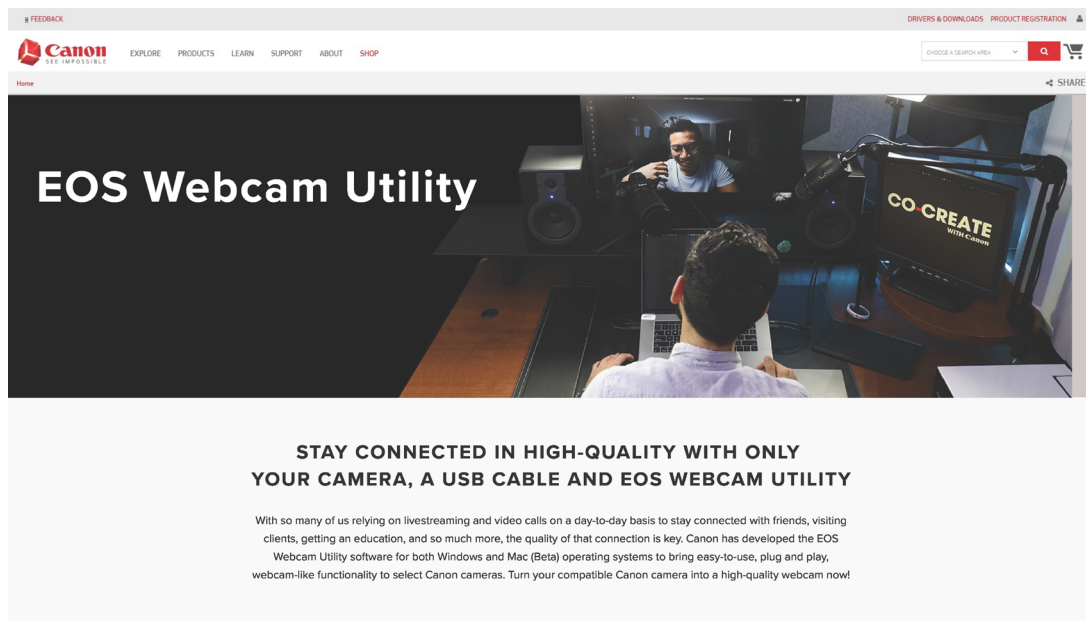

2. If navigating through the Canon USA Website, at the top of the main page, find the "Search Area."
3.

Type "EOS Webcam Utility" in the "Search Area" and hit enter.
4.

Select your camera model from the list displayed. You will then be redirected to the download page.

5. Select and download "EOS Webcam Utility" under the software section.
Note: If the beta version is installed, the official version will replace it.

HOW TO INSTALL

6. Once the software download is complete, locate the "EOS Webcam Installation Package" in your computer's "Downloads" folder. The file will be called "**EOSWebcamUtility-MAC1.0.pkg.zip**". Double-click the .zip file.
7. Run the EOSWebcamUtility-MAC1.0.pkg file.
8. You will then be greeted by the "Introduction" screen. Click "Continue."
9.

Read through the Important Information, then click "Continue'
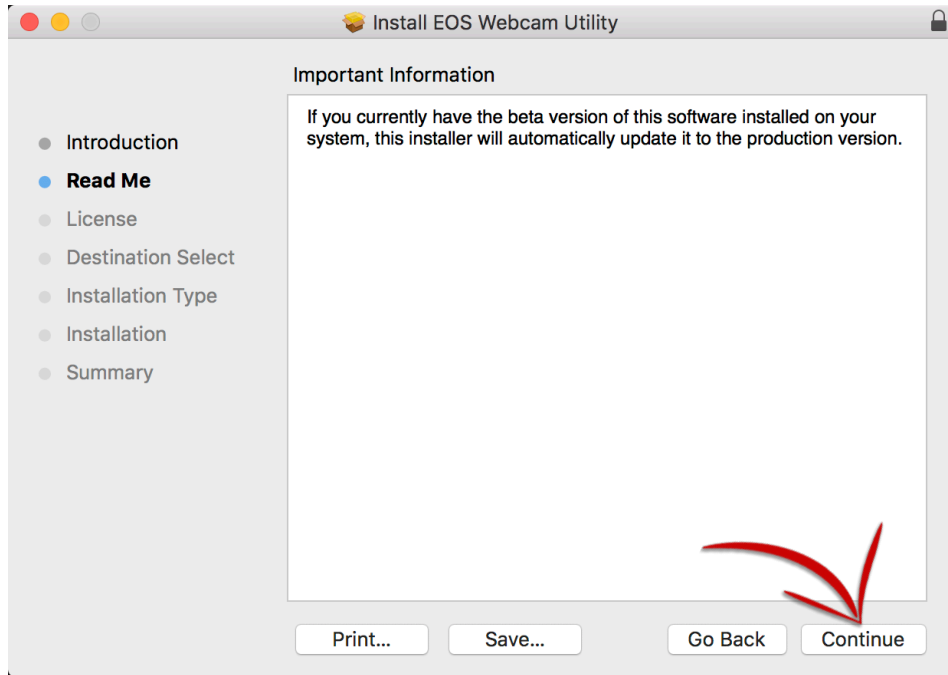

10.

Read through the Software License Agreement and if you agree, click "Continue" then "Agree"
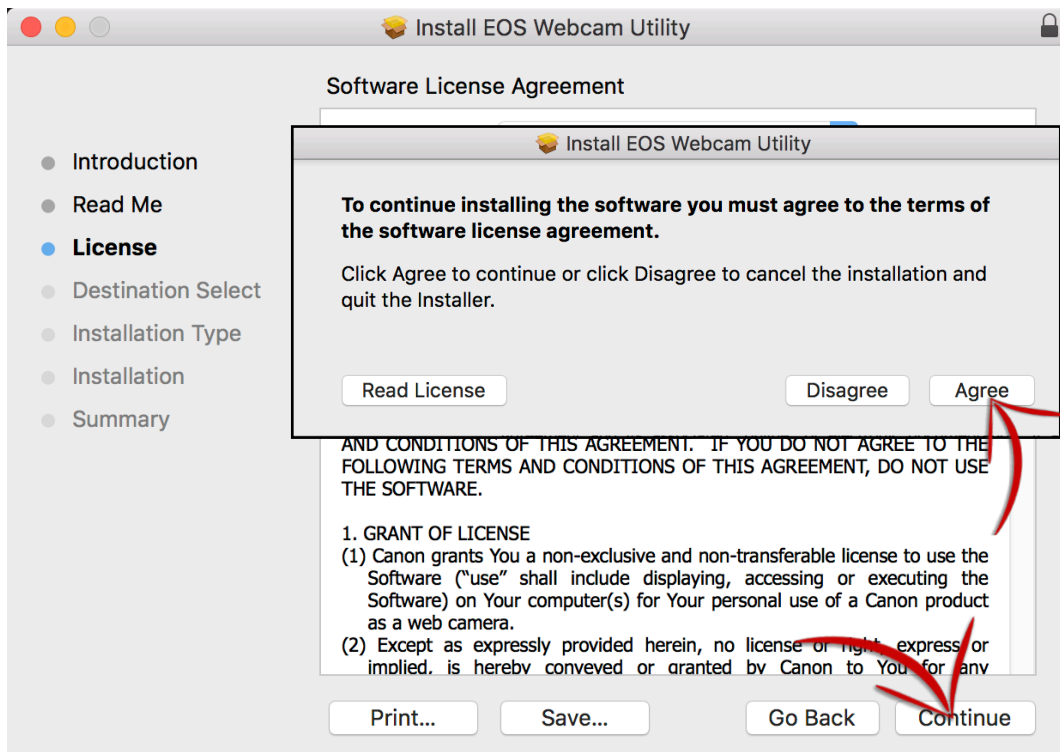

11.

Select your folder destination, then, click "Continue."
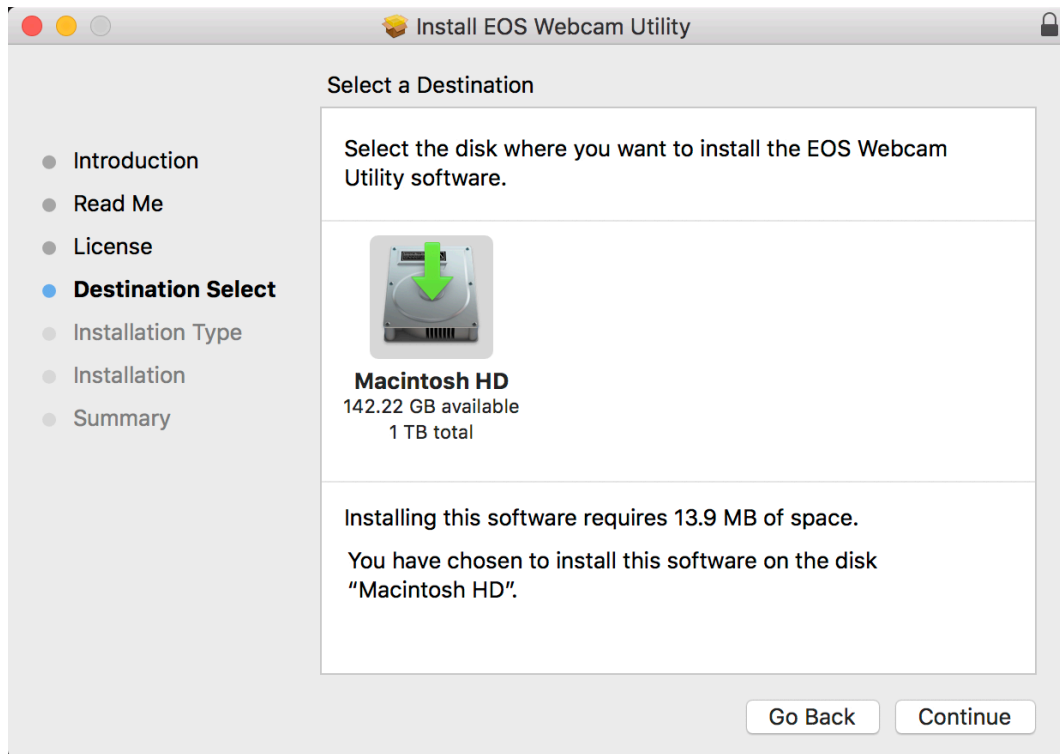

12.

The installer is now ready to begin. Click "Install" to proceed.
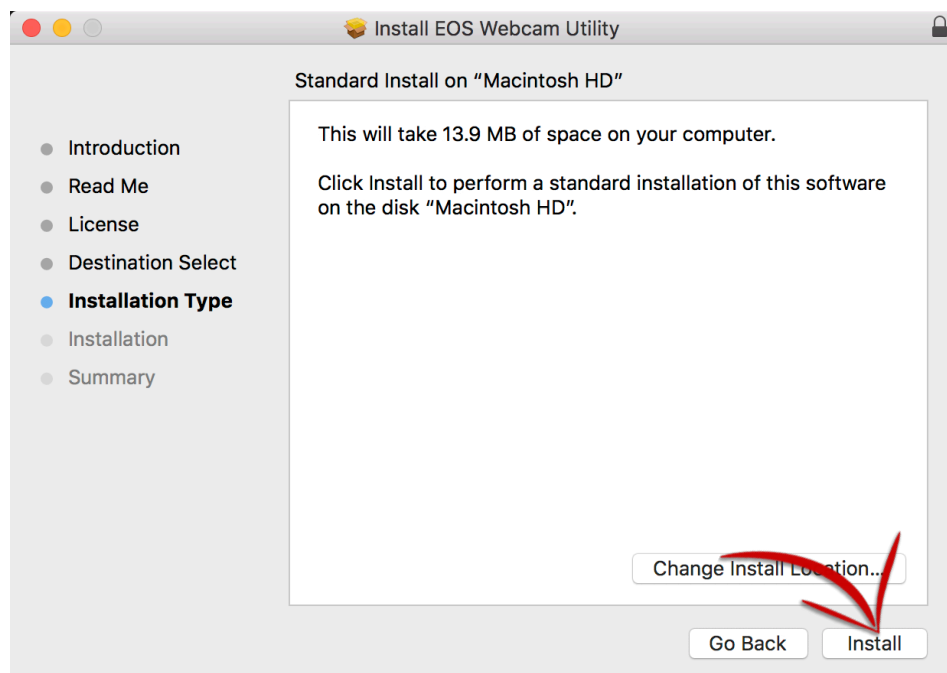

13. The installer will alert you that the computer must be restarted after installation. Click "Continue Installation" to proceed.
14. Close other applications and click "Restart" to restart your computer.
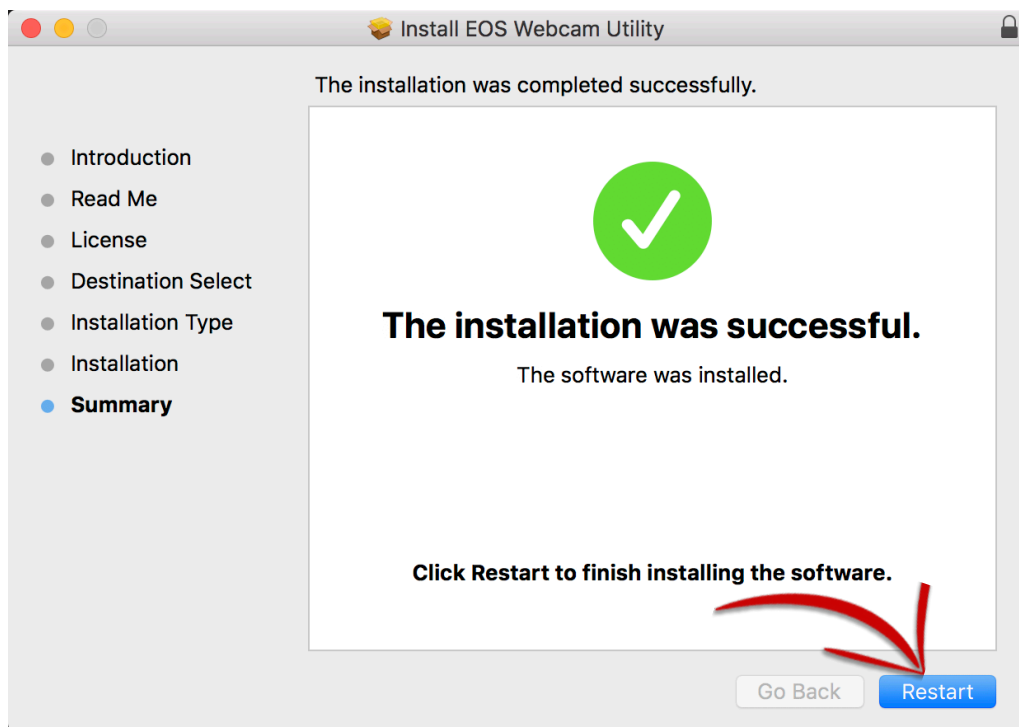

15. Once restarted, using your USB cable, connect one end of the USB cable to your camera, and then connect the other end to your computer. A direct connection to the computer is reccommended.

> **Note:** See the compatible accessory chart at the end regarding finding the correct cable for your camera.

16. Set your camera to [Movie Mode]. Use your camera's Mode Dial, Mode Switch or Mode Button interface.

> **Note:** Optimal settings are a resolution of [Full-HD] and a frame rate of [29.97P] (30P).
> If your camera doesn't have a [29.97P] (30P) setting, selecting [23.98P] (24P) will also work.

29.97P
17.

Lastly, open your web conferencing/streaming app of choice. Find the [Audio/video settings] menu and set "EOS Webcam Utility" as the camera of choice. Confirm that your computer's built-in microphone is selected as your "microphone"

Note: Audio is not transmitted from the camera.
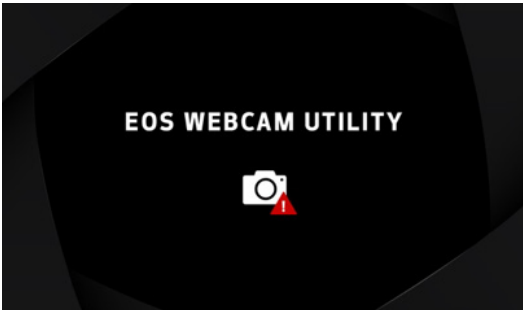

Camera

Enjoy easy-to-use, high-quality video conferencing with EOS Webcam Utility functionality.
