

Installing Your Multifunction to Your Network for the First Time

PIXMA MX532

Windows OS

Preparing to Connect the Multifunction To the Network

Network Requirements

Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

Wireless Connection

Before connecting the machine to the network, the computer needs to be connected to the network. Make sure that configuration of the computer and access point or router is complete.

Preparing to Connect the Multifunction To the Network

Notes on Network Connection

- The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device's instruction manual or contact its manufacturer.
- In an office setup, consult your network administrator
- If you connect to a network that is not protected with security measures, there is a risk of disclosing data such as your personal information to a third party.
- Place the machine and computer on the same network segment.

Installing the Drivers & Software

Software Installation

To use the machine by connecting it to a computer, software including the drivers needs to be copied (installed) to the computer's hard disk. Installation time varies depending on the computer environment or the number of application software to be installed.

IMPORTANT

- Log on as the administrator (or a member of the Administrators group).
- Quit all running applications before installation.
- Do not switch users during the installation process.
- Internet connection may be required during the installation. Connection fees may apply. Consult the internet service provider.
- It may be necessary to restart your computer during the installation process. Follow the on-screen instructions and do not remove the Setup CD-ROM during restarting. The installation resumes once your computer has restarted.
- If the firewall function of your security software is turned on, a warning message may appear that Canon software is attempting to access the network. If such a warning message appears, set the security software to always allow access.

Installing the Drivers & Software

To set up the PIXMA MX532 to your wireless network, you must first install the software to your computer.

To begin the setup procedure, insert the Setup CD-ROM into your computer.*

The setup program will start automatically. The setup instructions presented in this document describe the “**Cableless Setup**” method which does not require the need to know the SSID (network name), or network passphrase and does not require the printer to be temporarily connected to the computer with a USB cable.

The **Cableless Setup** is not supported in Windows XP. For Windows XP Users: Use the “[Setup Using a USB Cable](#)” method. You will need to know your SSID (network name / access point name) and Network Key (password) to successfully use this method to set up your printer with the wireless network.

*If you don't have or cannot use the Setup CD-ROM, follow the steps below to start the setup.

- [Download the software](#) (click the link to download)
- Double-click the downloaded .exe file (Win-MX530-1_0-ucd.exe)

If the **User Account Control** dialog box appears during the setup, click **Yes** or **Continue**.

Installing the Drivers & Software

Click **Next** on the initial screen

Installing the Drivers & Software

- Connecting to the wireless network

On the **Connection Method Selection** screen (1-1) select **Wireless Connection**.

Continue to follow on-screen instructions. Select **Connect to the network** when the **Printer Setup** (2-1) screen appears.

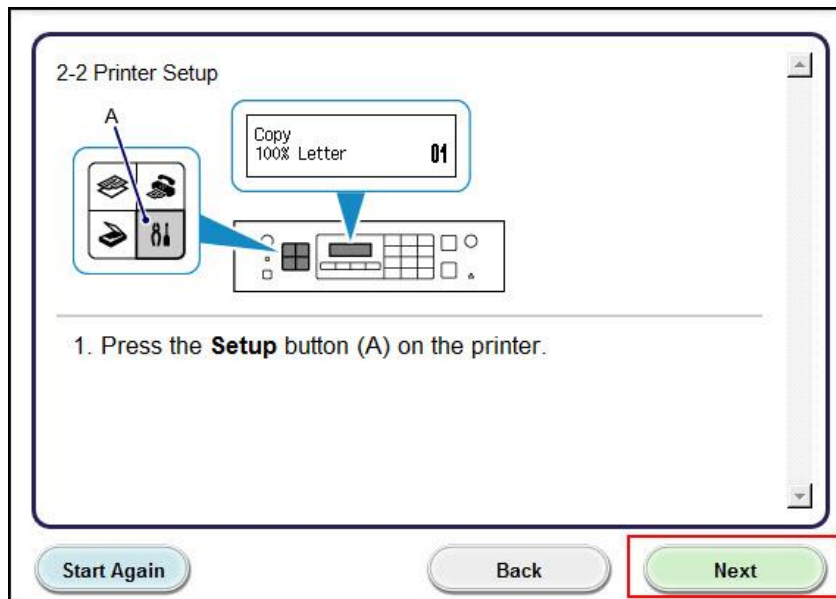

Installing the Drivers & Software

- Connecting to the wireless network

Continue to follow on-screen instructions.

Press the **Setup** button on the printer then click **Next** on the **Printer Setup (2-2)** screen.

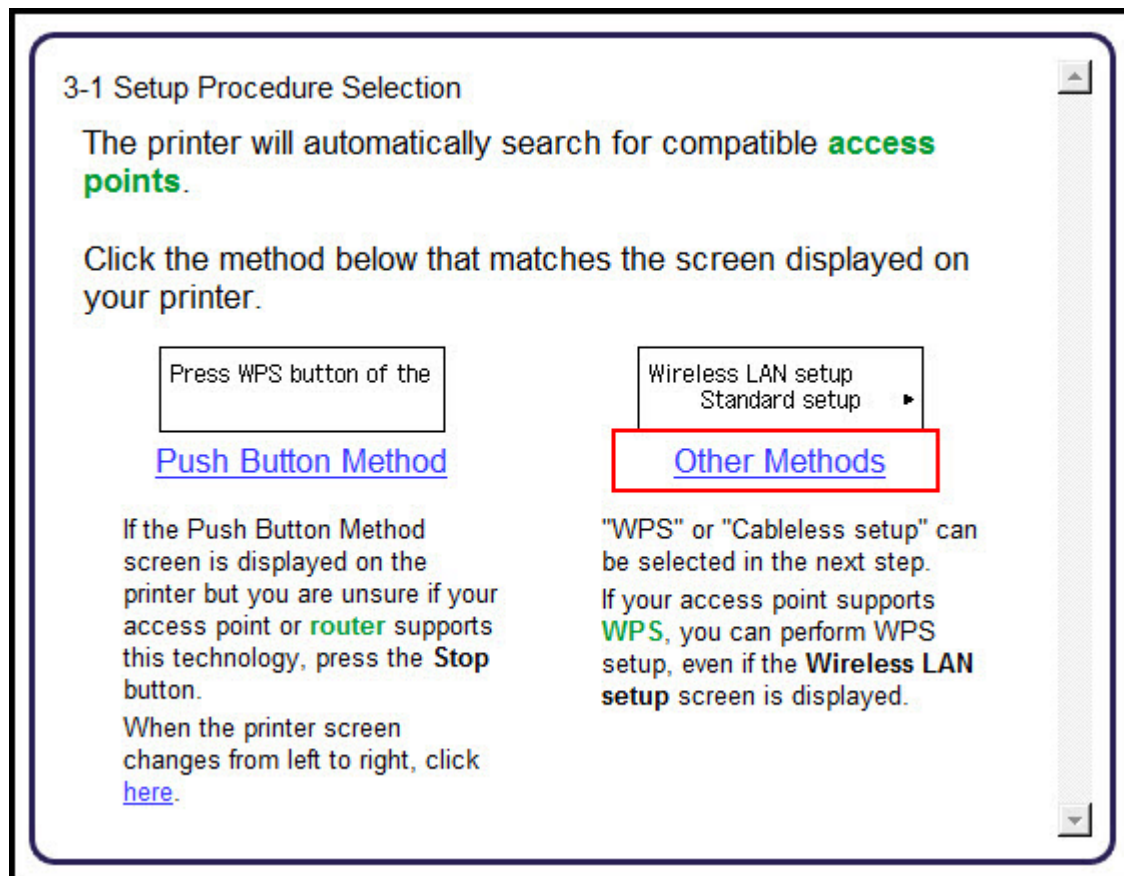

Carefully follow the instruction to select **Wireless LAN setup** on the printer. Press the **OK** button on the printer. Then, click **Next** on the **Printer Setup (2-3)** screen.

Installing the Drivers & Software

- Connecting to the wireless network

Continue to follow the on-screen instructions until the **Setup Procedure Selection** screen (3-1) appears. If your printer's LCD screen is the same as that shown above **Push Button Method** on the **Setup Procedure Selection** screen (3-1), press the printer's **Stop** button. Once your printer's screen is the same as that shown above **Other Methods**, click **Other Methods** on the **Setup Procedure Selection** screen (3-1).

Installing the Drivers & Software

- Connecting to the wireless network

Select **Cableless setup** on **Setup Procedure Selection** screen (3-2).

3-2 Setup Procedure Selection

Select the most suitable connection method from the following.

Connect to **WPS**-compatible **Access Point** WPS

Setting the Access Point Information to the Printer Directly from Computer, without Operating the Access Point **Cableless setup**

Cableless setup may take some time. Internet connection may become temporarily unavailable during setup.

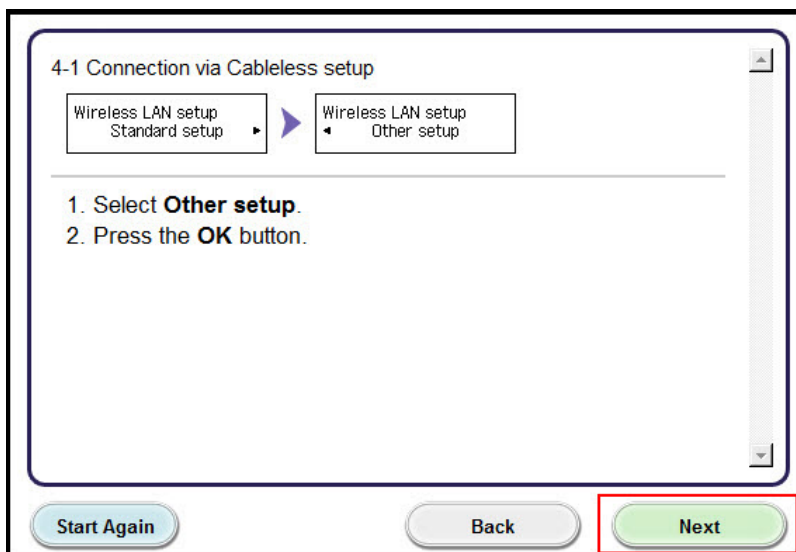

Cableless setup is not available on Windows XP. Perform setup with another connection method.

Connect Using Other Methods Other setup

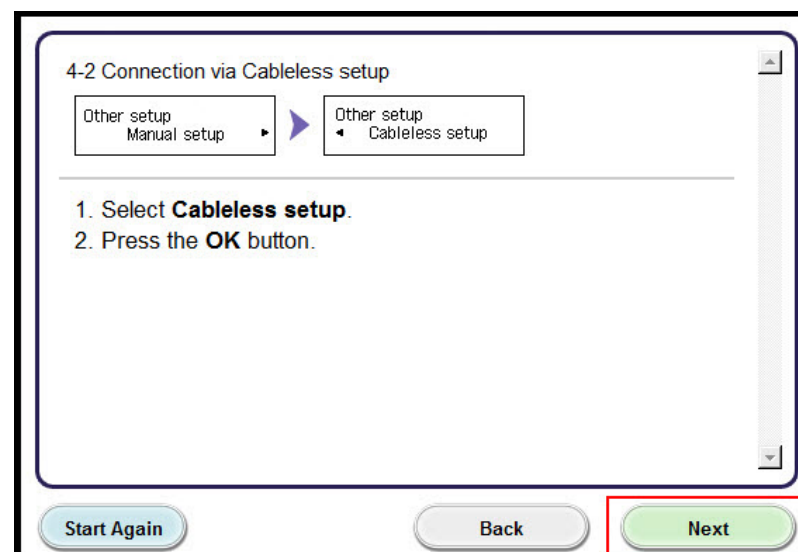

Installing the Drivers & Software

- Connecting to the wireless network

Select **Other setup** on your printer and press the **OK** button.
Click **Next** on the **Connection via Cableless setup** screen (4-1).

Select **Cableless setup** on your printer and press the **OK** button.
Click **Next** on the **Connection via Cableless setup** screen (4-2).

Installing the Drivers & Software

- Connecting to the wireless network

When the “**Follow the instructions...**” message appears on the printer’s display, click **Next** on the **Connection via Cableless setup** screen (4-3)

Installing the Drivers & Software

Continue following on-screen instructions. On the **Software Installation List**, select *software to install and click **Next**.

***MP Drivers** is required and cannot be deselected. We recommend installing **My Image Garden** and **Quick Menu** to take full advantage of the printer's features.

Software Installation List

The selected software will be installed. Make sure that the software you want to install is selected, and then click [Next].
