

Setting up the Wireless Printer to Additional Computers on the Network

PIXMA MX350 / MX870 Series
Mac OS

Set Up the Printer (MX350 / MX870) for use on additional computers on the Wireless Network

If your PIXMA MX350 or MX870 has already been set up on your wireless network, it is only necessary to install the software and drivers to the additional computer(s) on your wireless network. The network connection will be confirmed automatically

It is not necessary to reset the printer or make additional settings.

Steps to complete the setup are shown in the KnowledgeBase article "Setting up additional computer(s) for use over wireless LAN (Macintosh) - MX350 / MX870". Click the link below to access the article.
