Sending still images and movies from a camera to a smartphone

Sending still images and movies from a camera to a smartphone

Using a wireless LAN, you can send and receive still images and movies from a camera to a smartphone.

The connection to the smartphone is made using the wireless LAN's infrastructure mode or ad hoc mode.

NOTE

- Before connecting to a camera via wireless LAN, download and install the dedicated CameraWindow (free) application on your smartphone.

Connecting the camera to a smartphone wirelessly

Connect to the smartphone over the wireless LAN.

1. Press the <Playback> () button on the camera.
2. Touch ().

3. Touch ().

4. Touch [Add a Device].

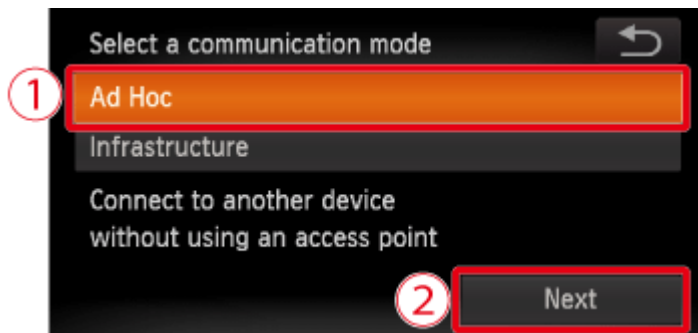

NOTE

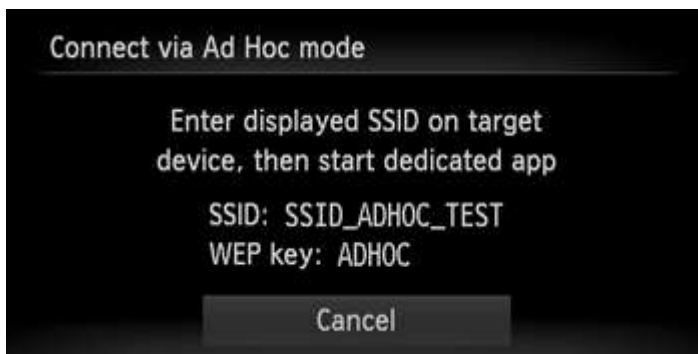

- If you register a smartphone, that smartphone's name will appear on the screen in step 4. From the second time onward, select the smartphone's name to make the connection.

5.

- ① Select [Ad Hoc], and then
- ② touch [Next].

6. The following screen appears.

Sending still images and movies from a camera to a smartphone

Operating the smartphone, connect to the access point shown on the camera's screen.

Choose the displayed SSID (network name) from the smartphone's Wi-Fi setting menu. Enter the WEP Key displayed on the camera screen into the password field on the smartphone.

7. Start CameraWindow on the smartphone.

NOTE

- Once the smartphone is recognized on the camera, the device connection screen will be displayed on the camera.

8. Choose a smartphone to connect to.

9. The following screen appears.

Choose [Yes] when you want to view camera images on a smartphone, and choose [No] when you don't want the images to be viewed on a smartphone.

Choose [Yes] to use a smartphone to send images from the camera to the smartphone.

10. The following screen appears.

11. Once you have connected to the smartphone, a screen like the one below will appear.

NOTE

- To add multiple smartphones, repeat the above procedures starting from step 4.
- To change privacy settings for smartphones added to the list, choose the smartphone whose settings you want to change from [Edit a Device] in step 4, and then choose [View Settings].
- To end the connection, touch the (↶) in the top-right corner of the screen, and then touch [OK] on the confirmation screen.
- When a connection destination is set using the Touch Actions setting, you can send images from the next time by just performing touch operations without needing to perform the connection operation again.
- See the Camera User Guide for details on Touch Action settings.

Sending still images and movies from a camera to a smartphone

Sending one image at a time to a smartphone

12. If you touch [Send this image], the image will be sent.

To select the image you want to send, touch the left/right edge of the image or drag right or left across the screen to choose an image.

To make the image smaller before sending it, touch either (▼) or (▲) and select the desired option.

13. The following screen appears.

After the image has been sent to the smartphone and the [Image sent] message appears, return to step 12.
