Network Requirements
Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

Notes on Network Connection
• The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device’s instruction manual or contact its manufacturer.

• The machine cannot be used over a wireless and wired connection at the same time.

Wireless Connection
Connect to your network environment over a wireless connection.
Preparing to Connect My Multifunction To My Network

Be sure to prepare an access point.

**Important Information You Need Before Adding Your Multifunction**

The following information is required to connect to your access point or router.

- **Access Point Name/Network Name:**
  Also referred to as SSID. A name to identify the specific access point.

- **Network Key:**
  Also referred to as encryption key, WEP key or WPA/WPA2 passphrase, Pre-Shared key. A password required to set to prevent unauthorized access to communication.
  Check your access point or router for the following information, and then write it down.

**NOTE:** For details on how to check the following information, refer to the manual of your access point or router, or contact its manufacturer.

An "Ad-hoc connection," which establishes a direct connection to the computer over a wireless connection without using an access point, is not supported.
Adding Your Multifunction to Your Network

**Step One**
Press the **Setup** button (A)

**Step Two**
Use the ▼ or ▲ button (B) to select **Wireless LAN setup**, then press the **OK** button
Adding Your Multifunction to Your Network

**Step Three**

Select **Yes**, then press the **OK** button.

When wireless connection is enabled, the Wi-Fi lamp (D) lights blue.

**Step Four**

Select **Easy setup**, and then press the **OK** button.
Adding Your Multifunction to Your Network

**Step Five**

Select the access point name, then press the **OK** button.

**NOTE:** If you are living in an apartment, nearby access points in use may be detected.

**Step Six**

Make sure that one of the screens, below, is displayed, then press the **OK** button.

If the following screen is not displayed, go to step 9.
Step Seven

Enter the network key you wrote down, then press the left FUNCTION button (E). Press the center FUNCTION button (F) to switch character entry modes.

Network key entry is case-sensitive. Be sure to enter upper and lower case letters correctly.

Step Eight

Make sure that the network key is correct, then press the left FUNCTION button. (below End setup)
Adding Your Multifunction to Your Network

Step Nine

When the screen below appears, press the **OK button**.

If **Failed to connect to the access point.** appears, press the **OK button**, make sure that the network key is correct, then enter it again. If a connection still cannot be established, refer to the printed manual: **Network Setup Troubleshooting**.
Installing the Drivers & Application Software

**Step One**
insert the **Setup CD-ROM** into the CD-ROM drive. If the program does not start automatically, double-click the CD-ROM icon in **Computer** or **My Computer**, then double-click **MSETUP4.EXE**.

For **Windows 7/Windows Vista**: Click **Run Msetup4.exe** on the AutoPlay screen, then click **Yes** or **Continue** on the User Account Control dialog box. If the User Account Control dialog box reappears in following steps, click **Yes** or **Continue**.

**Step Two**
Click **Easy Install**. The drivers, application software, and on-screen manuals are installed.
**Step Three**

On the next screen click **Install**

**Step Four**

Select **Use the printer with wireless LAN connection**, then click **Next**.
**Step Five**

Read the License Agreement screen carefully and click **Yes**.

**Step Six**

When the **Create an Alias on Desktop** screen appears, select **Agree** if you want an alias of the On-Screen manual to be placed on the desktop, otherwise select **Do not Agree**, then click **Next**.
## Installing the Drivers & Software

### Step Seven

Select **Agree** or **Do not Agree** on the **Add Easy-WebPrint EX to the Dock** screen, then click **Next**

### Step Eight

Click **Skip** or **Next** on the Download Easy-webPrint screen
Installing the Drivers & Software

**Step Nine**

When the **Printer Detection** screen appears, click **Next**

![Printer Detection Screen](image)

**Step Ten**

On the **Canon IJ Network Tool** screen, select **MX880 series** in **Printers** and click **Next**

![Canon IJ Network Tool Screen](image)
Registering the Printer & Scanner

This section describes how to register the machine on a Macintosh computer.

**Step One**

When the **Register Printer and Scanner** screen appears, click **Register Printer**.

Proceed to the section that relates to your operating system for further installation instructions

Mac OS X v. 10.5.x / 10.6.x: Go to Step 2-A

Mac OS X v. 10.4.11: Go to Step 2-B
Step Two
2-A
1. Select **Canon MXxxx series** in the list of printers, then click **Add**. *xxx* refers to the model number. **MX880 series** shown in example, below

![Add Printer Window](image)

2. Go to Step Three, page 20.

*The alphanumeric characters after Canon xxxx series is the machine's Bonjour service name or MAC address

Step Two
2-B (OS X v. 10.4.11)
1. When the **Printer List** window appears, click **Add**.

![Printer List Window](image)
**Registering the Printer & Scanner**

**Step Two**

2-B

2. Click **More Printers** in the Printer Browser window.

3. Select **Canon IJ Network** in the pop-up menu, select **Canon MXxxx series** in the list of printers, then click **Add**. *xxx refers to the model number. **MX880 series** shown in example, below
Registering the Printer & Scanner

**Step Two**

2-B
