Preparing to Connect My Multifunction To My Network

Network Requirements

Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

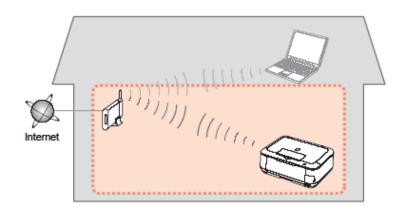

Notes on Network Connection

- The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device's instruction manual or contact its manufacturer.
- The machine cannot be used over a wireless and wired connection at the same time.

Wireless Connection

Connect to your network environment over a wireless connection.

Preparing to Connect My Multifunction To My Network

An "Ad-hoc connection," which establishes a direct connection to the computer over a wireless connection without using an access point, is not supported.

Be sure to prepare an access point.

Important Information You Need Before Adding Your Multifunction

The following information is required to connect to your access point or router.

• Access Point Name/Network Name:

Also referred to as SSID. A name to identify the specific access point.

• Network Key:

Also referred to as encryption key, WEP key or WPA/WPA2 passphrase, Pre-Shared key.

A password required to set to prevent unauthorized access to communication.

Check your access point or router for the following information, and then write it down.

NOTE: For details on how to check the following information, refer to the manual of your access point or router, or contact its manufacturer.

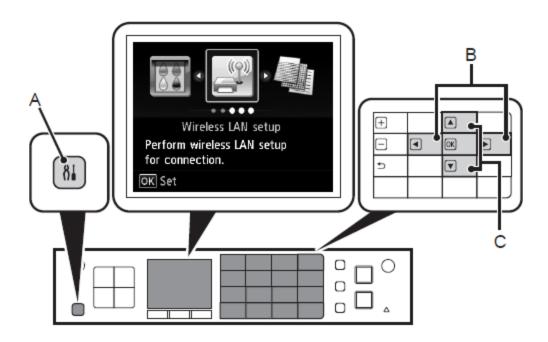

Adding Your Multifunction to Your Network

Step One

Press the **Setup** button (A)

Step Two

Use the ◀or ▶ button (B) to select **Wireless LAN setup**, then press the **OK** button

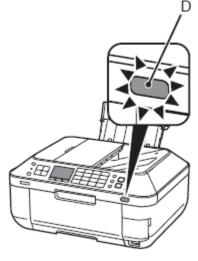

Step Three

Select **Yes**, then press the **OK** button.

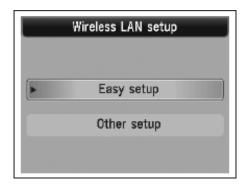

When wireless connection is enabled, the Wi-Fi lamp (D) lights blue.

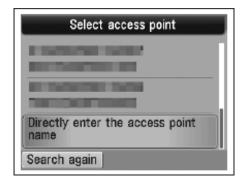

Step Four

Select **Easy setup**, and then press the **OK** button.

Step Five

Select the access point name, then press the **OK** button.

NOTE: If you are living in an apartment, nearby access points in use may be detected.

Step Six

Make sure that one of the screens, below, is displayed, then press the **OK button.**.

If the following screen is not displayed, go to step 9

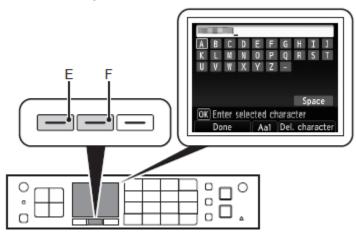

Step Seven

Enter the network key you wrote down, then press the left **FUNCTION button (E).**

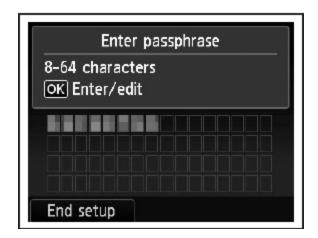

Press the center **FUNCTION** button **(F)** to switch character entry modes.

Network key entry is case-sensitive. Be sure to enter upper and lower case letters correctly.

Step Eight

Make sure that the network key is correct, then press the left **FUNCTION button. (below End setup)**

Step Nine

When the screen below appears, press the **OK button**.

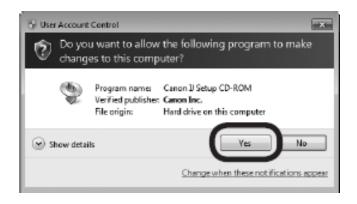

If Failed to connect to the access point. appears, press the OK button, make sure that the network key is correct, then enter it again. If a connection still cannot be established, refer to the printed manual: Network Setup Troubleshooting.

Installing the Drivers & Application Software

Step One

insert the **Setup CD-ROM into** the CD-ROM drive. If the program does not start automatically, double-click the CD-ROM icon in **Computer or My Computer, then doubleclick MSETUP4.EXE.**

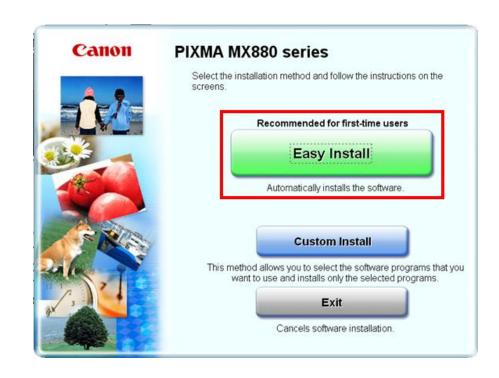

For Windows 7/Windows Vista: Click Run Msetup4.exe on the AutoPlay screen, then click Yes or Continue on the User Account Control dialog box. If the User Account Control dialog box reappears in following steps, click Yes or Continue.

Step Two

Click Easy Install.

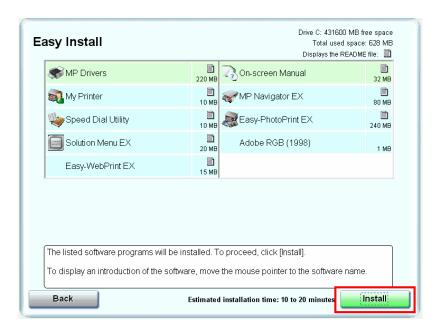

The drivers, application software, and on-screen manuals are installed.

Installing the Drivers and Software

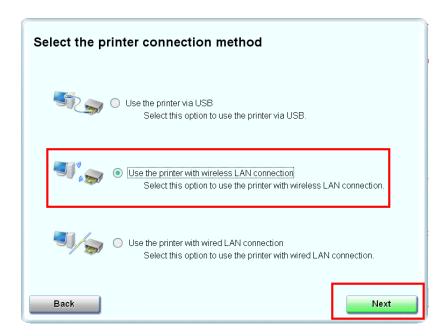

Step Three

On the next screen click Install

Step Four

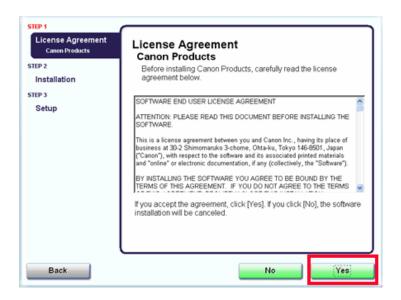

Select Use the printer with wireless LAN connection, then click Next.

Installing the Drivers & Software

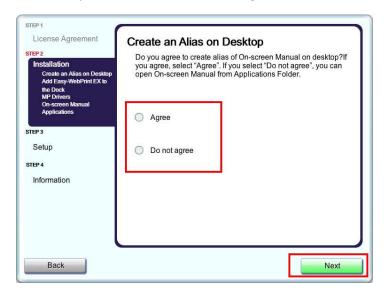

Step Five

Read the License Agreement screen carefully and click Yes.

Step Six

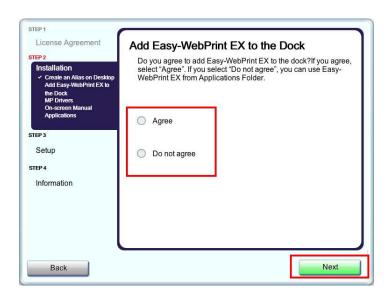

When the **Create an Alias on Desktop** screen appears, select **Agree** if you want an alias of the On-Screen manual to be placed on the desktop, otherwise select Do not Agree, then click **Next**

Installing the Drivers & Software

Step Seven

Select **Agree** or **Do not Agree** on the **Add Easy-WebPrint EX to the Dock** screen, then click **Next**

Step Eight

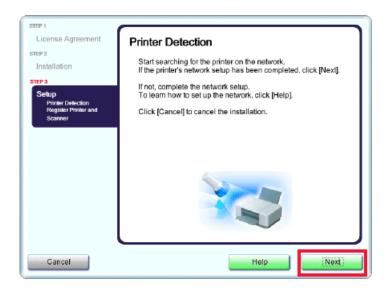

Click **Skip** or **Next** on the Download Easy-webPrint screen

Installing the Drivers & Software

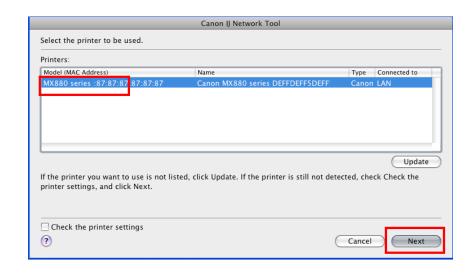

Step Nine

When the **Printer Detection** screen appears, click **Next**

Step Ten

On the **Canon IJ Network Tool** screen, select **MX880 series** in **Printers** and click **Next**

Registering the Printer & Scanner

This section describes how to register the machine on a Macintosh computer.

Step One

When the **Register Printer and Scanner** screen appears, click **Register Printer**.

Proceed to the section that relates to your operating system for further installation instructions

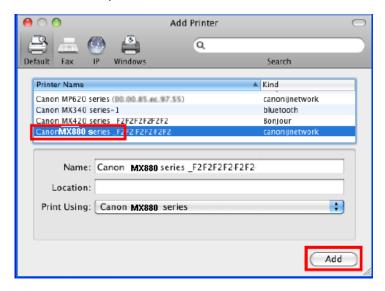

Mac OS X v. 10.5.x / 10.6.x: Go to Step 2-A

Mac OS X v. 10.4.11: Go to Step 2-B

Step Two

2-A

1. Select Canon MXxxx series in the list of printers, then click Add . *xxx refers to the model number. MX880 series shown in example, below

2. Go to Step Three, page 20.

*The alphanumeric characters after Canon xxxx series is the machine's Bonjour service name or MAC address

Step Two

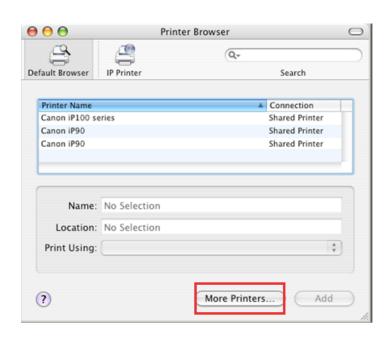

2-B (OS X v. 10.4.11)

1. When the **Printer List** window appears, click **Add**.

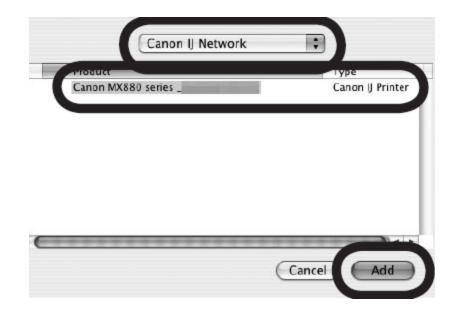

Step Two 2-B

2. Click More Printers in the Printer Browser window.

Step Two

3. Select **Canon IJ Network** in the pop-up menu, select **Canon MXxxx series** in the list of printers, then click **Add** . *xxx refers to the model number. **MX880 series** shown in example, below

Step Two

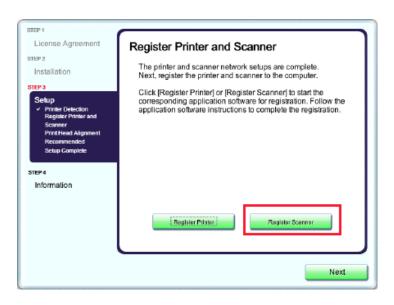

4. Make sure that the **Canon MXxxx series** is added to the list of printers.

*xxx refers to the model number. MX880 series shown in above example.

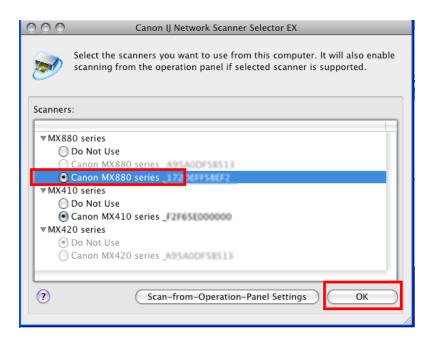

Step Three

When the **Register Printer and Scanner** screen appears, click **Register Scanner**.

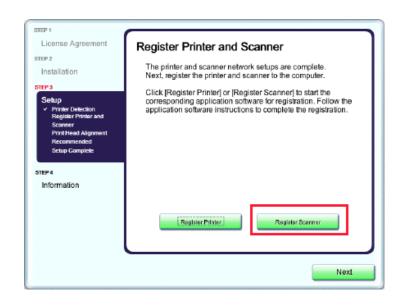

Step Four

Select Canon MX880 series on the Canon IJ Network Scanner Selector EX screen, then click OK

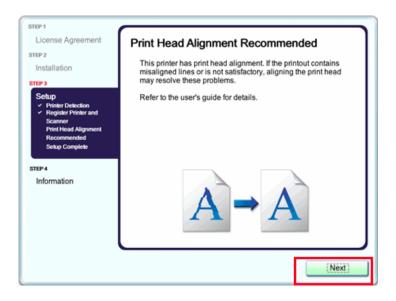

Step Five

Click **Next** on the **Register Printer and Scanner** screen.

Step Six

Click **Next** on the **Print Head Alignment Recommended** screen.

Step Seven

Click **Next** on the **Register Printer and Scanner** screen.

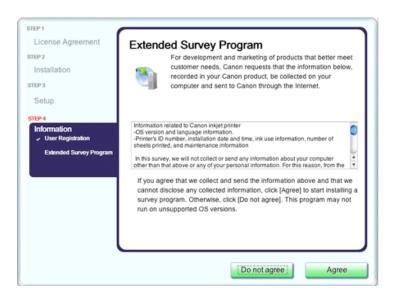

Step Eight

If the **User Registration** screen appears, read the information and click **Next or Cancel**.

If the **Extended Survey Program** screen appears: If you can agree to Extended Survey Program, click **Agree**. If you click **Do not agree**, the Extended Survey Program will not be installed. (This has no effect on the machine's functionality.).

Step Nine

Click Exit. Setup is complete

^{*}It is necessary to restart the computer before scanning using the Operation Panel on the machine for the first time.
